

Mr. J. Robert Mann Jr.
Chief Executive Officer
E-J Electric Installation Co.
46-41 Vernon Blvd.
Long Island City, NY 11101

Dear Bob:

Please accept this letter of recommendation on behalf of E-J Electric Installation Co. E-J Electric is one of the premiere electrical contractors in the New York Metropolitan area and has a long and distinguished performance record with The Durst Organization.

The Durst Organization has employed E-J Electric to execute several complex projects including work on our most recent project, the 2.1 million sq. ft. commercial office building known as One Bryant Park, which is expected to earn a coveted LEED Platinum rating. E-J Electric's work at One Bryant Park included the electrical installation for the 4.6 megawatt cogeneration plant, one of the first gas turbine electric generating facilities installed in a high-rise commercial office building. In addition to the Base Building work, E-J also performed critical electrical infrastructure work for our tenant, Bank of America, including the Bank's UPS system, emergency power generation and electrical distribution system.

Most important, E-J Electric's highly competent and qualified management team ensures that their work is performed to the highest of standards.

Our organization looks forward to many more successful projects together.

Sincerely,

Louis J. Esposito
Chief Operating Officer
