

MANN REPORT

The 111-Year Leader in Electrical Construction and Data Communications

Anthony Mann

E-J Electric Installation Co. (E-J) has provided unparalleled integrity, quality and service in the electrical field over its 111-year span in the industry. The company has several divisions including power generation, building services, data and communications, transit, roadway and outdoor specialty, first call emergency response and energy services.

Three family generations of practical expertise have created an organization keyed to the most modern technological advances that provide rapid and efficient solutions to today's lighting, power, energy and communication needs. Typical installations include: office buildings, airports, hospitals, power plants, co-generation facilities, data communication centers, industrial plants, universities, sport stadiums, transit facilities, roadway installations and high-voltage distribution.

History of The Company

Founded in 1899, E-J is the oldest independent electrical contractor in the country. From its start the company has focused on offering specialized services such as innovative electric installations in the entertainment industry. E-J provided stage lighting and wiring studios on landmark venues like Radio City Music Hall, the Metropolitan Opera House, Jazz at Lincoln Center and New York's Fiorello H. LaGuardia High School for the Performing Arts.

E-J later moved to work on large construction projects like the rehabilitation of the Long Island Railroad with the addition of major 13kV substations for LIRR power. E-J was selected for the

construction of the AT&T World Headquarters and later chosen to create the largest automated mail system in the country at the Manhattan General Mail Facility.

E-J Today

Today, E-J continues its tradition as a leader in the electrical construction industry. The company is committed to early identification of advanced trends in equipment and systems design and has the ability to provide state-of-the-art service. For these reasons, E-J is considered one of the leading "full-service" electrical contracting firms in the U.S. and the world.

The latest E-J projects include the JetBlue Airways Terminal and American Airlines International Arrivals' billion-dollar terminal at JFK Airport, the Mandarin Oriental Hotel, 5 Times Square's 38-story, 1.1-million-square-foot building and the 44-story New York Times Headquarters.

Power Generation

Power generation, transmission and distribution have been a specialty of E-J's for many years. Their power division consists of high-voltage installations, cogeneration and emergency and demand load generation. E-J recently completed two, 500-MW Power Plants: for the New York Power Authority and for Astoria Energy as well as a 6.5-MW co-generation facility in the LEED-Platinum Certified Bank of America Tower at Bryant Park in New York City.

Building Services

E-J's Service Team comprises renowned estimators, engineers, project managers, draftsmen, and field personnel that meet the

comprehensive electrical needs of all organizations, large and small. E-J's satellite offices throughout NYC provide manpower and supplies that support clients on a daily basis as well as permit team members to respond swiftly to emergencies. Building managers throughout the New York Metropolitan area rely on E-J for competitive and dependable engineering, design and installation services 24 hours a day.

Energy Services

E-J Energy Services provides cost saving energy solutions using reliable and sustainable methods. The division staff includes Certified Energy Managers (CEM), LEED-accredited professionals, Professional Engineers (PE), and other highly qualified support staff capable of accurately assessing a building's energy inefficiencies and identifying solutions to cut costs and optimize facility operations.
