**Subject:** E-J Electric Lights Up Indian Point

Dear Mr. Mann,

I wanted to take a moment to recognize the quality job completed by your crew which helped Indian Point restore an important 138KV feeder that had been out of service for nearly 18 months. We had initially awarded this job to another contractor who on the day the job was supposed to begin (November 7) backed out due to other obligations. I reached out to Anthony Badalamenti who during the previous week I had informed that we were awarding this job to another contractor for some help and he was able to juggle his crews' schedules and provide a top notch team to head north.

The E-J Electric Team of Doug Neu, Pat Collins and Scott Gordon should be recognized for working under difficult conditions, long hours and overcoming numerous administrative hurdles thrown at them to complete a lead joint repair on schedule. Their dedication and commitment to Safety should be recognized and has paved the way for E-J Electric to become eligible to bid on future projects at Indian Point. On a personal note I was thankful that your crew completed this project in time to allow us all to enjoy a peaceful Thanksgiving Holiday with our families.

I am looking forward to working with you and your Team in 2014 and years to come.
