**Re: Barclays Center**

Dear Bob:

We want to thank you for E-J's exceptional work on Barclays Center, the centerpiece of the Atlantic Yards project in Brooklyn, NY. E-J's scope spanned from the electrical distribution, low voltage, and audio visual, not to mention E-J's concurrent work on the NYCT transit connection, the LIRR yard relocation and the site work. Your dedication to the project was an integral part of its successful delivery.

E-J was brought into the design build process for the arena by Hunt Construction Group early in this project and was instrumental in advancing many of the design solutions. The efforts and talents of your team were a significant contribution to the great results we achieved on an extraordinary project.

It was a tough, complex project in many respects, but it was a pleasure working with E-J. Thank you for your leadership; we look forward to the opportunity to work together again soon.

Sincerely,

Linda Chiarelli
