**Re: Central Synagogue**

Dear Bob:

We completed Central Synagogue together with your superb engineering and electrical construction staff. It is just up the block from my office. I pass it many times a week and am reminded that it was a labor of love for all of us, including the fine team from E-J.

E-J's excellent performance on this very complex, difficult and important project was a milestone of Project Management and construction cooperation. I am available to speak with anyone regarding your role and hope to work with E-J on many future constructions.

Sincerely  
**Levien & Company, Inc.**
