President – E-J Electric Installation Company

**Reference:** Astoria Energy II  
**PROJECT COMPLETION**

Tony,

I wanted to take a moment to “thank you and your project staff” for E-J Electric’s contribution to the overall success of the Astoria II Energy Project, which achieved Commercial Operation on July1, 2011.

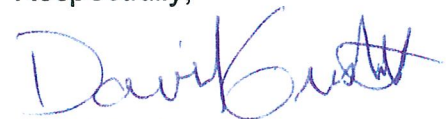

E-J’s commitment to safety, quality and execution of the work was exemplary and those attributes are further highlighted, when consideration is given to the nuances of the Project, which included some very challenging site logistics, a complicated permitting process and an extremely aggressive construction schedule.

E-J’s site staff deported itself professionally and cooperatively under the direction of Brendon Bergin, Tom Kregel and Augie Calabro, never losing sight of the Project’s “combined objective”, an attitude that was essential to the success of the Astoria II Energy Project.

E-J’s dedication to the Project was obvious on many fronts as evidenced by the long hours of planning spent by your staff and front-line supervisors. That “dedication” did much to set the tone and define the true depth of your organization.

In closing, it’s been a pleasure working with a company of E-J’s caliber and I hope that the opportunity to work with you and your staff again, will present itself in the future. I wish the very best of luck to you, Bob and the rest of E-J Electric.

Respectfully,

David Gustat  
Senior Project Director
