Mr. Anthony E. Mann  
E-J Electric Installation Co.  
46-41 Vernon Blvd.  
Long Island City, NY 11101

Dear Mr. Mann,

EJ Electric was contracted to execute the electrical work at JetBlue Terminal 5 at JFK International Airport. On behalf of Turner Construction Company, I would like to thank E-J Electric for the professional and timely work you did to bring this project to completion.

Headed by Frank Lambraia, the entire E-J team provided top flight service, working around a challenging schedule, while keeping in mind JetBlue's commitment to future growth. Your project management team, engineering staff, and highly-trained workforce were all very knowledgeable and efficient. They made all the difference in the timely completion of this multi-faceted project.

You and your team should be proud of your success. I look forward to working with you again.

Sincerely,  
**TURNER CONSTRUCTION COMPANY**
