*New Digital Signage for easy Wayfinding throughout the Station*

1. Engineering, coordination, furnishing and installation of the Power Distribution, Lighting, and all related scope and services to complete the Penn Station Phase II Project which consisted of track level work, Back of House Fit Out, One Penn Plaza LIRR train crew quarters, Penn Station Concourse, and the NYCT 1,2,3 Subway station work.
2. New digital signage and communications systems including Public Address/Mass Notification System, Fire Alarm, Fiber Backbone, Access Control, CCTV, PIDS, TVM, Telephone-Data, and Radio allow for easy navigation throughout the new concourse.
3. New elevators and the widening of the corridor contributes to a more comfortable commute for the 600,000 riders who pass through the concourse each day.
